

Polarized-Media Air Cleaners capture the smallest sub-micron particles, in addition to airborne allergens, and some gases and odors. Polarized-Media Air Cleaners capture 97% of particles at .3 microns and continues trapping particles much smaller in size.

PROBLEM SOLUTION

* Only use genuine LPD replacement media. Using unauthorized replacement media will affect the efficacy of your P-MAC, will void the Lifetime Warranty and may prevent proper air flow, which strains your HVAC equipment performance.

Polarized-Media Air Cleaner

ADVANTAGES

- Removes respirable particles
- Removes odor absorbing particles
- Prevents dirt/dust buildup on HVAC components
- Prevents dirt/dust buildup on HVAC coils and fans
- Heavy duty frame construction
- Dual brush seal around the frame
- Diamond screen design
- Low Pressure Drop (LPD) center charging grid
- Installs into existing filter tracks
- Potted electronic board with titanium probe
- Disposable media pad, replace 3 – 4 months

BENEFITS

- Asthma and allergy relief
- Freshens the air
- Prevents premature breakdowns
- Prevents overpayments of utility bills
- Solid firm fit for peak air flow
- Prevents particle blow-by
- Allows for optimum air flow
- Uniform charge throughout the media
- Avoids costly duct modification
- Protects the electronics from breakdown
- Easy replacement to maintain peak efficiency
